

Remarks

Applicants herein amend the first paragraph of the specification to include the issued U.S. Patent number for parent application 10/269,614. Applicants further amend said paragraph to clearly state that the benefit of U.S. Provisional Application Ser. No. 60/341,037 is claimed in the '614 application. Although this specific amendment is not necessary (as the original paragraph includes language having the same effect, as the Application Data Sheet filed with the present application clearly identifies application 60/341,037, and as the filing receipt acknowledges the priority claims to applications 10/269,614 and 60/341,037), Applicants make this amendment out of an abundance of caution .

Respectfully submitted,

H. Wayne Porter
